Service-Learning Objectives

In recognition of the fact that service without learning is not service learning, this form documents the academic intent of the service learner and informs the professor of the academic goals of the service placement. Each service learner will develop at least three measurable learning objectives. Your professor will acknowledge your objectives by signing this document. Some examples of objectives are provided to assist you in developing your own.

Learning Objectives #1
(Example for a tutoring placement might be: to identify some problems common to the mastery of algebra)

Learning Objectives #2
(Example for a homeless shelter might be: to identify some causes of homelessness)

Learning Objectives #3
(Example for a child development assignment might be: to observe and record gender distinctions in child behavior)
