2+2 Program

General Business Distance Education Program

Austin Community College-Kansas State University 2+2 Partnership

Kansas State University and Austin Community College offer a 2+2 program that allows students to earn an Associate of Science Degree in Business Administration at Austin, and to transfer the majority of those credits to K-State towards the completion of a Bachelor of Science in General Business offered through distance education.

General Business Degree Option through Distance Education

K-State offers a Bachelor of Science degree in General Business through distance education. This degree completion program is designed primarily for students who have completed the equivalent of the first two years of the business administration pre-professions (BAPP) program outlined by the College of Business Administration. The General Business degree provides a solid understanding of the fundamental areas in business: finance, accounting, management, and marketing. The curriculum is designed to prepare the student for the diverse environment of the business world. Applications for admission to this program are accepted through the Bachelor's Degree Completion Program in the Division of Continuing Education.

A Career in General Business

Kansas State University's business graduates find jobs with large corporations and small businesses, government agencies, and nonprofit organizations. You'll find them involved with banking activities, trading on the commodity and stock exchanges, working in advertising agencies, practicing accounting in public and private firms, and working in major manufacturing businesses. They can also be found helping small businesses grow, working in family businesses, and even starting their own businesses. Our graduates also hire and supervise employees, train new managers, plan budgets, create new products, and set up company-wide information systems.
