

WDWK 2405 INTERMEDIATE WOODWORKING

Project Information

The hardwood for the project is supplied by the student.

The Shaker style sofa/hall table can be built with either a lap drawer or a dovetail drawer.

Furniture building requires a patient, systematic and focused approach. The prep time is very important to accomplish the end product. Slow down and feel confident about your set up before you make the cuts. Always use your milled scrap material to test each set up. LABEL, LABEL, LABEL!

Types of Hardwood

Because so many students use the tools in the shop, our blades become dull very quickly. It requires a great amount of time to sharpen, change and calibrate the tools. Consider buying wood that is user friendly. You will have more success with the end product.
