

Objectives: CHAPTER 23 – INFECTIONS OF THE GENITOURINARY SYSTEM
(10/06)

Please note that the format of the objectives for the 4th Unit are different. There are no definitions but lots of information that you have to learn. Don't wait till the last minute to study. Study before the presentation of each chapter and after. Essay questions will be taken from the major categories. Compare and Contrast questions are my favorite here. (ex. Compare and Contrast the STD diseases called syphilis and gonorrhea)

AT THE COMPLETION OF CHAPTER 23 AND LECTURE NOTES, THE STUDENT WILL BE ABLE TO DESCRIBE THE CHARACTERISTICS FOR THE FOLLOWING INFECTIOUS DISEASES OF THE GENITOURINARY SYSTEM:

A. THE STUDENT WILL KNOW THE CHARACTERISTICS FOR THE FOLLOWING MAJOR SEXUALLY TRANSMITTED DISEASES OF GENITOURINARY TRACT:

1. Neisseria gonorrhoea – GONORRHEA
2. Treponema pallidum – SYPHILIS
3. Chlamydia trachomatis
4. Herpes simplex II

KNOW THE TYPE OF ORGANISM, SPECIAL CHARACTERISTICS OF THE ORGANISM
TYPE OF INFECTION (INCLUDING THE PROGRESSION OF SYPHILIS)
MODE OF TRANSMISSION
TREATMENT AND PREVENTION

B. THE STUDENT WILL KNOW THE CHARACTERISTICS FOR THE FOLLOWING:

1. E. coli
2. Gardnerella vaginalis
3. Candida albicans
4. Trichomonas vaginalis
5. Group B streptococcus
6. Cytomegalovirus

Type of organism (bacterial, viral, protozoan)
Type of Infection
