CURRENT LIST OF APPROVED CALCULATORS

NO CALCULATORS OTHER THAN THE ONES ON THE LIST BELOW ARE PERMITTED TO BE USED ON EXAMS IN THIS COURSE!! **Any calculator with a model number that differs from one of these ONLY IN THE LAST LETTERS or that HAS ONLY LETTERS ADDED TO THE END OF ONE OF THESE is OK without further approval.**

YOU MAY **NOT** USE CALCULATORS ON CELL TELEPHONES OR ON PDAs (Palm Pilot, etc.)

New additions to the list of calculators are shown in **RED**.

If your calculator is not on the list below and you think that it would qualify, bring it to me during office hours -- I will periodically post an updated list of approved calculators. If your calculator has any of the following buttons --

PROG, PGM, CLEAR, CLR

-- it is probably programmable and will probably not be acceptable.

If your calculator has a large screen and can graph functions, it is programmable and will not be acceptable.

NOTE -- There are now some cheap HP calculators that are not programmable and so are acceptable (see below). For those of you who are used to the reverse Polish notation of the traditional HP calculators, be aware that these nonprogrammable ones might use a different order of data entry than the traditional HP calculators.

LIST OF APPROVED CALCULATORS:

Any calculator with a model number that differs from one of these *ONLY IN THE LAST LETTERS* or that *HAS ONLY LETTERS ADDED TO THE END OF ONE OF THESE* is OK without further approval.

ADLER-ROYAL: TA Concorde 2
