

Dr. Sackett's filled chemistry classes

Fact: Regrettably, some classes are filled.

Unworkable solutions:

- There are no waiting lists.
- Lab classes cannot be overloaded under any circumstances.
- The instructor has no control over registration issues.

Possible, but unlikely solutions:

- Attempt to register first thing in the morning after a payment deadline.
- Attempt to register at random times particularly during drop-add
- When attempting to register, don't rely on the web to indicate an opening, as the web is at least 3 hours behind the registration system. That is, just try regardless of what is shown on the web.

Good luck!
