

Central Texas Veterans Health Care System

Following the tragedies of September 11, 2001, the Department of Homeland Security mandated increased cyber-security measures at all federal facilities. Our Human Resources Management Service (HSRM) and Information Security Officer request that you inform your Program Director of the following, more stringent requirements:

- All affiliated trainees must report to HRMS, Teague Tower, Building 162, Room C-100, for processing.
- If your students will require computer access during clinical training, they must complete mandatory Cyber Security Awareness Training annually. Training should be completed prior to reporting to duty and is accessible at the following website (affiliated trainee must first enroll): <https://www.ees-learning.net> A training certificate must be printed after Cyber Security Awareness Training completion and returned to the Central Texas Veterans Health Care System (CTVHCS) Office of Education (14) at the address printed above.
