

What to Accomplish at the Very Beginning of MATD 0390 Class

All on-campus 0390 students should complete all steps below as soon as possible.

- Set up your ACCmail account at <http://www.austincc.edu/accmail/>. Your ACC email address is firstname.lastname@g.austincc.edu, unless another ACC student has your same first and last name. Then your last name may have a number immediately following it, such as firstname.lastname2@g.austincc.edu. To find out for sure, go to Online Services at <https://onlineserv.austincc.edu/WebAdvisor/WebAdvisor>. Click on Current Students. Then log in with your ACCeID and password (info at <https://www3.austincc.edu/acceid/>), and click on ACCmail to find your ACCmail user name, initial password, and a link to activate your new ACCmail account. Your initial password will be ten digits: the last 4 digits of your ACC ID (info at http://www.austincc.edu/support/admissions/student_id.php) or ACCeID, followed by your 6-digit birthday in MMDDYY form. If you want all email automatically forwarded from your ACCmail to your usual email, follow the steps at <http://mail.google.com/support/bin/answer.py?hl=en&answer=10957> to set up your ACCmail to forward email automatically. Note: the only difference between your ACC ID and ACCeID is that your ACCeID has 8 digits: the first initial of your first name followed immediately by your full 7-digit ACC ID number.
- To verify that a computer math class is right for you, complete the handout at <http://www.austincc.edu/jbickham/lecturevscomputer.pdf>.
- To make sure you are in the appropriate level math course, complete the Review for the MATD 0390 Pretest at <http://www.austincc.edu/mthdept2/prereqd/0390/>, and then take the actual Pretest in Blackboard at <http://aconline.austincc.edu/>. You should pass this Pretest with a score of at least 70% correct. Otherwise, you should contact me at jbickham@austincc.edu because it is likely you should enroll in a previous course: MATD 0370 Elementary Algebra or MATD 0330 Basic Math Skills. Be sure that you understand the importance of taking the correct level math class by reading the TSI and class expectation requirements at <http://www.austincc.edu/jbickham/tsi>.
- Once you have determined that this is the correct class for you by completing all steps above, get your MyMathLab access (with or without a book) and register for MyMathLab by following the instructions at <http://www.austincc.edu/jbickham/mymathlabinfo.pdf>. For students with short-term financial issues, such as waiting for financial aid, the method for obtaining temporary access has changed, so you should [contact your instructor](#) immediately if you need temporary access to MyMathLab. Get your notebook paper, pencils, erasers, and scientific (non-graphing) calculator. Print graph paper at <http://www.austincc.edu/jbickham/GraphPaper.pdf> as needed.
- Get started right away on the first assignments from the Weekly Schedule for your class, posted at <http://www.austincc.edu/jbickham/handouts>.
