

STUDENT INFORMATION TO AID IN CREATING CLINICAL ROTATION SCHEDULE

Name _____ Date _____

I will try very hard to create a clinical schedule that will be compatible with your work/class schedules and where you live. But since this is not always possible please keep in mind that the schedule created for you is designed so that upon successful completion of the clinical training you will have acquired entry level competency skills in the field of phlebotomy. ***You must have at least 4 hours available in the morning or afternoon on consecutive days.*** This is exclusive of the time you are attending phlebotomy class. Once the class ends you will spend those days in clinical also.

1. Briefly describe where you live geographically. (NW Austin, Far South Austin East of I-35):

2. What is the name of your employer?

3. Where is your employer geographically located?

4. Do you plan to work as a phlebotomist? (***Circle one***) NO PART-TIME FULL-TIME

5. What is your career or educational goal?

6. Please fill in your daily schedule below:

	Monday	Tuesday	Wednesday	Thursday	Friday
Work Hours					

****Do NOT include the Phlebotomy course as this will end prior to clinical****

	Monday	Tuesday	Wednesday	Thursday	Friday
Class Hours					

Revised: August 27, 2007
