

Web Committee Meeting Minutes
October 12, 2006

Meeting led by Edward Terry

Members in attendance:

Milton Gatewood, Carol Smith, Annette Royal, Margaret Peloquin, Ana Lahti, Terry Arzola, Andrew Christie, Stevan Wilsan and Derek Thomas

Discussion --

A "Meeting Minute Repository" program is under review. Andrew Christie will research and talk about this idea at the next meeting.

IRT tech. development group is launching 3 pages on Oct. 16th. Web Development, Streaming, Blackboard. Digital Imaging to come soon.

The purpose of these developmental pages is so that template builders have the tools necessary for their own pages.

It has been requested that a page for Alumni and Former Students be created. More research to be done on this. Will go back to Government Relations to find out exactly how this will be used and how it will be managed at the end. An additional module would need to be purchased and linked to Colleague (Datatel) so that data can be shared.

Inside ACC is finally going to go away. Note to current users informing them that page is to be pulled and to change bookmarks.

Web Committee to look at Administrative Rule and make sure that rule defines all current duties of the committee. Issues related to "page policing" to be looked at. Policing necessary to ensure that college pages are standard and fit requirements.

CMS still needed. CMS will take care of many of the outstanding issues that are sitting out there. What is the status of CMS purchase?
