Chapter 10: Hemoglobinopathies

Outline

a. Classification
b. Hemoglobinopathy
   i. Definition
   ii. Introduction
   iii. Laboratory tests and findings
   iv. Conditions
      1. Sickle Cell anemia
         a. Introduction
         b. Frequency
         c. Pathophysiology
         d. Clinical features
         e. Peripheral blood findings
         f. Special tests for sickle cell anemia
         g. Chemistry tests
         h. Treatment
      2. Sickle cell trait
         a. Introduction
         b. Laboratory features
      3. Hemoglobin C Disease
         a. Introduction
         b. Laboratory Findings
         c. Peripheral smear
      4. Hemoglobin C trait
         a. Introduction
         b. Treatment
      5. Hemoglobin S/C Disease
         a. Introduction
         b. Peripheral smear
      6. Hemoglobin D Disease
         a. Introduction
         b. Hemoglobin E Disease
         c. Introduction
         d. Laboratory findings
      7. Hemoglobins with Increased Oxygen Affinity
         a. Introduction
8. Hemoglobins with Decreased Oxygen Affinity  
   a. Introduction
9. Unstable Hemoglobin Disease  
   a. Introduction
10. Methemoglobinemia  
    a. Introduction  
    b. Laboratory Findings
