

MATH 1342 Lab class OPTIONAL

ACC has a statistics lab class each long session, taught by one of the MATH 1342 teachers. It starts on Friday, Sept. 25 and meets on Fridays. This semester it is at the Highland Campus, taught by Gustavo Cepparo.

Each semester, those of my students who take the class tell me that it was very valuable to them and definitely helped them pass the course. You sign up for it like any other ACC course. The deadline for registration is around Sept. 14, but I suspect it will fill up well before then.

Here's the information about it.

MATH 0159 Elementary Statistics Lab
