Analysis of Campus-based Services

Process Summary

An on-line version of the Internal College Survey (ICS) measuring employee responses to college-wide and campus-based services was administered in spring 2008. The purpose of the survey is to provide data to help areas improve their service. Survey responses were analyzed to determine which offices of the college were best meeting employee expectations on three dimensions: *overall quality*, *promptness* and *service attitude*.

The following analysis discusses the results for *overall quality* (the other two service dimensions tend to track with *overall quality*). In interpreting the results it is also important to remember that the offices were rated on a five point scale: 1=Very Dissatisfied, 2=Dissatisfied, 3=Neutral, 4=Satisfied, 5=Very Satisfied.

Appendix A

Survey Development, Methodology and Administration

The original ACC Internal College Survey was conducted in 1996 and has been modified each year to reflect both changes in the organizational structure and improvements in the survey process. ACC employees have been surveyed typically each spring regarding their satisfaction with college services in the previous year. In surveys conducted prior to 2006 campus-based offices were assessed by the respondent choosing the one campus they were most familiar with and then using that campus as the basis for all campus specific responses. Starting with the 2006 survey respondents can rate campus-based services at each campus.

For the 2008 ICS, mean scores for 2008 and 2007 were calculated and were reported for campus offices. The first table for each campus presents the mean ratings for 2008 for all three service dimensions with the offices listed in alphabetical order. The next tables then focus on *overall quality*, *promptness* and *service attitude* separately. For each service dimension the 2008 results are presented compared to the results for 2007 and the difference between the means is calculated. The 2008 means are also ranked as well as the mean differences. The ranking of means involves numbering the means for 2008 in descending order with a rank of “1” assigned to the highest mean. The ranking of mean differences involves the same procedure with a rank of “1” assigned to the highest positive difference between means for 2007 and 2008.
