

**Assessment and Advising Committee
November 18, 2011**

All students who test into two or more developmental areas MUST enroll into HUDE 0111 or an approved alternate course, by their 2nd semester or they will encounter a hold each semester of noncompliance. They must earn a grade of "C" or higher. Previously, the administrative rule stated that students were required to enroll into the course by their 3rd semester. The hold had not really been enforced recently, but now it appears the holds are back.

Personal Enrichment/Self Improvement process has been approved effective April 1, 2012 for fall 2012. Students who want to take courses for personal enrichment or self-improvement will be TSI waived. They will still have to meet the appropriate skills requirement for the course. The student must tell the advisor of their intent and their course registration must reflect that intent. The student will not be able to enroll in more than 2 classes per semester, may enroll only through audit process, and must indicate major as - **Undeclared-taking courses for self-improvement**. They will only be allowed to register through an advisor and will have a hold each semester. They will be withdrawn from any classes for which he/she was not advised for. They will have the option to change major to avoid withdrawal. Audit courses cannot be used to satisfy a certificate or degree requirement.

If a student takes Math Statway courses (combined sections of MATD-0166 and MATH-1342), MATD-0166 will be considered the exit level course and make student TSI complete in math, as long as he/she earns a "C" or higher. This is true even if the student does not pass MATH-1342. A student who successfully passes MATD-0166 can only register for MATH-1342.

The math department does not want to indicate a placement score for MATD-0385 on the placement chart because they want students take MATD-0370 before taking MATD-0385. A student who makes a 39 or higher on math compass (TSI requirement) and plans to take MATH-1332; may register for MATD-0385 beforehand to prepare for Math-1332.

Some of the Datatel screens that we have to go through Favorites or Navigation tool bars can be accessed by typing ST- in front of command. For example, type in ST-IASU to see transcripts received. We were not told which screens could be accessed this way. This was an example given during the meeting.

We are expecting many changes related to TSI in upcoming semesters, possibly fall 2012, due to legislative changes and THECB policies.
