Instructor: Rob Lewis
Preferred Phone: 512.775.6940
Office hours: M&W 5:30 pm – 6:00 pm CYP adjunct office cube or Micro Prep room
By appointment: CYP - TBA

For conferences outside of office hours, leave a voice mail message or e-mail me at rlewis3 (at) austincc.edu

This Microbiology Class Web site – YOUR source for information! : http://www.austincc.edu/rlewis3

Important dates:
Last Day to Drop w/o a “W”= Sept 12th
Final day to drop = Nov 26th
Syllabus
BIOL 2420
Microbiology for the Health Sciences
Summer Semester 2018

Course Description for BIOL 2420
The Microbiology for the Health Sciences class provides an overview of the microbial world and the techniques to study it. Topics include the basic characteristics of fungi, algae, bacteria, and viruses. Special emphasis is placed on topics and applications that relate to humans. The skills required for this class include proficiencies in reading and writing as well as official prerequisites of one of the following, passed with a minimum grade of “C”:
   Biol 1406 Cellular & Molecular Biology
   OR
   Biol 2101/2304 Human Anatomy (Lec & Lab)
   OR
   Biol 2304/2101 (Human Anatomy)
   OR
   Bio 2404 Intro to Anatomy & Physiology
   OR
   Equivalent
Note: This Biology 2420 class does not count as credit toward the Associate of Science degree in Biology.

Texts/Materials
The textbooks used as a basis for the Microbiology for the Health Sciences lectures are:

Recommended:
- OpenStax Microbiology from Rice University = Free Book w excellent resources.
  https://openstax.org/details/books/microbiology
  OpenStax Microbiology
  Publish Date  Nov 01, 2016
  Print
  ISBN-10: 1938168143
  Digital
  iBooks
  ISBN-10: 0-9986257-0-1

License: Microbiology by OpenStax is licensed under Creative Commons Attribution License v4.0

Optional resources include:
  Author: Robert Bauman

- Bauman's Microbiology with Diseases by Body System, 3rd edition - 2011
  Author: Robert Bauman

- Microbiology: A Systems Approach, second edition
  by Cowan, Marjorie Kelly; Talaro, Kathleen Park. 2008.
Recommended laboratory manual, either of the following:

- Microbiology Laboratory Theory and Application by Leboffe and Pierce. 2006.

OR

- Photographic Atlas For The Microbiology Lab (looseleaf) 4th ed [2011]
  by Leboffe and Pierce. 2011
  Morton Publishing Company.

Other required materials include:

- Composition notebook for recording laboratory observations and exercises
- Sharpie® brand marker for glass
- **REQUIRED** for safety -- closed toe shoes and long hair tied up during laboratory, laboratory Safety Glasses, lab coat or apron.

</table>

**Instructional Methodology**

This *Microbiology for the Health Sciences* course is taught through lecture in the classroom and as an interactive, hands-on learning exercise in the laboratory.

**Course Rationale**

This course provides a survey of microorganisms. This survey includes the various microbial environments and the microbial interactions with multi-cellular organisms, especially humans. This course pays special attention to those microbes that are pathogenic to humans. The goal of *Microbiology for the Health Sciences* is to adequately prepare students for the health science programs at ACC.

**Learning Outcomes**

**Course Level:**

Specific skills and competencies are expected of students who successfully complete this course. These proficiencies include the following: Understand and explain microbiological processes in detail appropriate to this course, including:

- History, scope and trends in microbiology
- Germ theory of disease and its development
- Aseptic procedures and materials for culturing and growth of microbes.
- Enumerate and differentiate the groups of organisms included for study in microbiology.
- Distinguish between eukaryotic and prokaryotic cell types.
- Energy acquisition and utilization by microbes and the function of enzymes in cellular activities.
- Microbial metabolism
- Fundamental nucleic acid chemistry including replication, genetic code, protein synthesis, metabolic regulation, and cellular reproduction.
- Microbial genetics, including sexual & asexual reproduction, transformation, transduction and conjugation in bacteria.
- Biotechnology related to microbes
- Symbiotic relationships (commensal, mutualistic, parasitic)
- Disease process, signs, symptoms, etiology, course, prevention/control, diagnosis, treatment of common human organ system infectious diseases
- Immunological processes, both (innate) nonspecific and specific (adaptive)
- Principles and methods of diagnosing disease and epidemiology
- Safe laboratory practices that include aseptic techniques and appropriate disposal or biological/biohazardous waste.

**General Education:**

- Observe phenomena, record and analyze data
- Construct graphs and/or tables from data
- Read and understand graphs to derive data/information
- Make inferences from data
- Demonstrate higher level thinking skills and problem solving
- Manipulate laboratory equipment appropriately
- Demonstrate safe work practices in a lab setting
- Work effectively as part of a team
- Demonstrate ability to understand and follow directions
Common Course Objectives
Common course objectives are attached and can also be found on the Biology Department page: http://sites.austincc.edu/biology/common-course-objectives/

Course Prerequisites
The official prerequisites for Microbiology for the Health Sciences are:

- BIOL 1406 - Cellular & Molecular Biology
  OR
- BIOL 2401 - Anatomy & Physiology I
  OR
- BIOL 2404 - Intro to Anatomy & Physiology
  OR
- equivalents with lecture and laboratory.

A minimum grade of C is required, as defined in the Austin Community College Catalog. These prerequisites are strictly enforced. Additionally, all biology courses require passing grades for the reading, writing, and math components of the basic skills test.

Managing the Prerequisite Course Load:

Many ACC Health Sciences programs require BIOL 2401, BIOL 2402, and BIOL 2420 as prerequisites. Due to the rigorous nature of each of these courses, it is not recommended to take two of them in one semester. The Biology department recommends taking these courses in the following sequence to balance the course load:
1. Semester 1: BIOL 2401 – A&P I
2. Semester 2: BIOL 2402 – A&P II
3. Semester 3: BIOL 2420 – Microbiology for the Health Sciences

Accommodation of Special Needs
Students with special needs that are documented by letters from the Office of Students with Disabilities must meet with the instructor during the first week of class to make arrangements for accommodation of their needs.

Attendance
Attendance in lecture is the student’s responsibility, laboratory session attendance is mandatory. Your performance in the course depends on your attendance and participation. Students with unexcused excessive absences (2 or more) can be dropped from the class.

Lectures
The lecture schedule indicates textbook topic assignments and posted notes for each lecture period. Students are expected to read the assigned material before the scheduled date and be prepared to discuss assigned material in class. Students cannot use electronic devices during lecture without permission. Please! No laptops, electronic tablets or telephones. Do not mess with your smart watches…

Exams
Students are expected to prepare for examinations that encompass all material scheduled, regardless of lecture coverage. Exams are scheduled in advance and are administered in class on the scheduled dates. Each successive exam may contain previous material, thus necessitating continuous review.

Exam Format
Exams can include some combination of matching, multiple choice, short answer, fill-in-the-blank, and discussion or essay questions. There can also be charts, graphs, or tables to read, interpret or complete.

Policies
The following paragraphs describe policies to which this course adheres.
Missed Exams
A missed exam can be made up with instructor permission if the absence is excused. The exam must be made up as soon as possible after the scheduled date of the missed exam. Make-up exams can differ in format and level of difficulty from that of scheduled exams.

Outside Assignments
In addition to reading and preparing for both lecture and lab classes, students are required to work on hand-out materials, such as case studies and exercises, and readings from the textbook, throughout the semester. Students are also required to prepare case studies or disease presentations for grading and class presentation.

Late Work
Grades for late assignments can be reduced by ten percent (10%) of the maximum possible points on that assignment for each day the assignment is late up to the day of the unit exam. Late work will not be accepted after the end date for the unit for which it is assigned.

Withdrawal
Although students are responsible for initiating a withdrawal (W) from the class, the instructor reserves the right to initiate student withdrawal.

Reinstatement
To be reinstated within a class, the student must be enrolled in the course on the state reporting date, as demonstrated by the twelfth-day class roll. The student must have been withdrawn from the course in error and the student must show evidence of capability of passing the course within the time that remains in the semester. The instructor must have documentation that the student is eligible to be reinstated in the course.

Extended Hours Support Services
The following extended hours for services are available to our students:

- Open Laboratory hours are normally available throughout the semester on Friday. Check with the laboratory assistant to determine available times, and to verify that someone will be available to let you in the lab.
- A science study lab is available at the Riverside Campus, Building A, Room 2233 Monday through Thursday 9:00 a.m. to 8:30 p.m. and Fridays 9:00 a.m. to 2:00 p.m.
- Tutoring is available in the learning labs of some campuses. See page 9 of the ACC Student Handbook for additional information.

Student Support Services
Resources to support you are available at every campus.
Food pantries are available at all campus Student Life offices (https://sites.austincc.edu/sl/programs/foodpantry/)
Assistance paying for childcare or utility bills is available at any campus Support Center (http://www.austincc.edu/students/support-center).
For sudden, unexpected expenses that may cause you to withdraw from one or more of your courses, go to http://www.austincc.edu/SEF to request emergency assistance through the Student Emergency Fund.
Help with budgeting for college and family life is available through the Student Money Management Office (http://sites.austincc.edu/money/).
Counselors are available at any campus if you experience a personal or mental health concern (http://www.austincc.edu/students/counseling).
All services are free and confidential.

Concealed Handgun Policy

Courses Held in Exclusion Zones
The Austin Community College District concealed handgun policy ensures compliance with Section 411.2031 of the Texas Government Code (also known as the Campus Carry Law), while maintaining ACC’s commitment to provide a safe environment for its students, faculty, staff, and visitors.

Beginning August 1, 2017, individuals who are licensed to carry (LTC) may do so on campus premises except in locations and at activities prohibited by state or federal law, or the college’s concealed handgun policy.
It is the responsibility of license holders to conceal their handguns at all times.
Persons who see a handgun on campus are asked to contact the ACC Police Department by dialing 222 from a campus phone or 512-223-7999.

**IMPORTANT**: Classes held in an area designated as an exclusion zone as defined by state law or the college’s concealed handgun policy. Concealed carry is prohibited in exclusion zones. Concealed weapons must be stored in a secure place as defined by college policy prior to entering the classroom, studio, or learning space.

Refer to the concealed handgun policy online at [austinecc.edu/campuscarry](http://austinecc.edu/campuscarry).

**Courses Held in Non-Exclusion Zones (Classrooms)**

The Austin Community College District concealed handgun policy ensures compliance with Section 411.2031 of the Texas Government Code (also known as the Campus Carry Law), while maintaining ACC’s commitment to provide a safe environment for its students, faculty, staff, and visitors.

Beginning August 1, 2017, individuals who are licensed to carry (LTC) may do so on campus premises except in locations and at activities prohibited by state or federal law, or the college’s concealed handgun policy.

It is the responsibility of license holders to conceal their handguns at all times. Persons who see a handgun on campus are asked to contact the ACC Police Department by dialing 222 from a campus phone or 512-223-7999.

Refer to the concealed handgun policy online at [austinecc.edu/campuscarry](http://austinecc.edu/campuscarry).
Course Grades and Their Calculation
The grades for this course are calculated on values from both the lecture and laboratory sections. The maximum point values for the various grade components are listed in the tables that follow.

Lecture Grade Values:

<table>
<thead>
<tr>
<th>Lecture Exams</th>
<th>Point Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exam points (based on 100%)</td>
<td>Sum of exam points= 300</td>
</tr>
<tr>
<td>Additional Activities</td>
<td></td>
</tr>
<tr>
<td>Disease presentations</td>
<td>40 points</td>
</tr>
<tr>
<td>Take Home Exam</td>
<td>35 points</td>
</tr>
<tr>
<td>Total Possible Points</td>
<td>375</td>
</tr>
<tr>
<td>Total possible points (75% of grade)</td>
<td>375</td>
</tr>
</tbody>
</table>

Laboratory Grade Values:

<table>
<thead>
<tr>
<th>Lab Exams</th>
<th>Point Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exam points (based on 100%)</td>
<td>Sum of exam points= 400</td>
</tr>
<tr>
<td>Lab Activity</td>
<td></td>
</tr>
<tr>
<td>Unknowns (5)</td>
<td>10 points each = 50</td>
</tr>
<tr>
<td>Total possible points (25% of grade)</td>
<td>450</td>
</tr>
</tbody>
</table>

Calculating Overall Course Grade Value
The final grade in the course consists of values from both the lecture and the laboratory. The laboratory grade is worth 25% of the final grade and the lecture is worth 75%. The average grade point values of the lecture is multiplied by three and added together with the laboratory grade average to yield the final grade percentage value

<table>
<thead>
<tr>
<th>Lecture Value (Average):</th>
<th>(Your Total Lecture Points/375) * 100</th>
<th>= X</th>
</tr>
</thead>
<tbody>
<tr>
<td>Laboratory Value (Average):</td>
<td>(Your Total Lab Points/450) * 100</td>
<td>= Y</td>
</tr>
<tr>
<td>Final Grade Average:</td>
<td></td>
<td>= [(3X+Y)/4]*100</td>
</tr>
</tbody>
</table>
Determining Letter Grades

Course letter grades are assigned based on the final percentage value accumulated by each student. The letter grades are based on percentages of the maximum possible number of points:

<table>
<thead>
<tr>
<th>Percentage Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% or more</td>
<td>A</td>
</tr>
<tr>
<td>80% - 89.9%</td>
<td>B</td>
</tr>
<tr>
<td>70% - 79.9%</td>
<td>C</td>
</tr>
<tr>
<td>60% - 69.9%</td>
<td>D</td>
</tr>
<tr>
<td>less than 60%</td>
<td>F</td>
</tr>
</tbody>
</table>

Incomplete (I) grades will be given in consultation with the student and upon agreement of the instructor when extenuating circumstances have prevented the student from completing the course.

To be considered for an incomplete ("I"), a student must have successfully completed a minimum of four units in the course.

Note: An Incomplete (I) grade must be completed by a college-wide deadline before the end of the following semester, including the Summer term. If the incomplete is not completed by that deadline, the incomplete (I) grade automatically becomes a failing grade (F).

About the Laboratory Class

The laboratory portion of BIOL 2420 is an integral and important part of microbiological education. The lab manual presents the basic concepts of microbiology in a self-instructional manner. The purpose of this approach is to encourage the students to think for themselves, take initiatives, and be responsible for their work.

Planning ahead, including reading the lab manual exercise prior to class allows for efficient work. Thinking about the process and requirements for each lab can pay great dividends. It is not beneficial to be bashful. It is efficient to cooperate and do your share of the work when working on a team. Do not be fearful of asking questions.

Students cannot use electronic devices during laboratories without permission. No laptops, electronic pads or telephones, please.

Laboratory Attendance

Regular attendance in the laboratory course is mandatory. Your performance is directly related to the punctuality, consistency and quality of your attendance. Students with unexcused excessive absences (2 or more) can be dropped from the class.

Note: Laboratory experiments cannot be made up after the dates for which they are scheduled.

Participation

A schedule of laboratory activities is included herein. Each student is responsible for the following:

- Reading the assigned modules before the lab
- Attending scheduled labs
- Assisting partners with group activities
- Performing individual activities
- Recording results in notebooks and/or worksheets
- Reviewing all laboratory material appropriately in preparation for lab exams.

Laboratory Materials

Required:
The following materials may be purchased from the college bookstore:
- Sharpie® brand marker
- Bound composition notebook with sewn-in pages.
- For safety -- closed toe shoes and long hair tied up during laboratory
- Laboratory Safety Glasses (occasional use)

Recommended:
- Lab coat or apron
- Safety glasses if you wear contact lenses to the lab.

Note: Inoculating needles, loops and handles, slides, cover slips, and lens paper are furnished by the laboratory.
Laboratory Grades

Grades for the laboratory portion of this course will be determined as described in the section entitled *Course Grades and Their Calculation*.

Statement on Laboratory Safety

"Health and safety are paramount values in science classrooms, laboratories and field activities. Students are expected to learn, understand and comply with environmental, health and safety (EHS) procedures and protocols, and must agree to abide by the ACC science safety policy. Students are expected to conduct themselves with appropriate professional behavior and with respect and courtesy to all. Anyone who thoughtlessly or intentionally jeopardizes the health or safety of another individual will be immediately dismissed from the day’s activity, may be withdrawn from the class, and/or barred from attending all activities. Specific safety information for each activity will be discussed at the beginning of the activity. For those activities that require specific safety training, a student who is late and misses the safety training will not be able to participate in the activity.” The comprehensive science safety policy can be found at: [http://www.austincc.edu/sci_safe/](http://www.austincc.edu/sci_safe/).

Additional ACC Policies

Statement on Scholastic Dishonesty

"Acts prohibited by the college for which discipline may be administered include scholastic dishonesty, including but not limited to, cheating on an exam or quiz, plagiarizing, and unauthorized collaboration with another in preparing outside work. Academic work submitted by students shall be the result of their thought, research or self-expression. Academic work is defined as, but not limited to, tests, quizzes, whether taken electronically or on paper; projects, either individual or group; classroom presentations; and homework."

Statement on Students with Disabilities

"Each ACC campus offers support services for students with documented physical or psychological disabilities. Students with disabilities must request reasonable accommodations through the Office of Students with Disabilities on the campus where they expect to take the majority of their classes. Students are encouraged to do this three weeks before the start of the semester. Students who are requesting accommodation must provide the instructor with a letter of accommodation from the Office of Students with Disabilities (OSD) at the beginning of the semester. Accommodations can only be made after the instructor receives the letter of accommodation from OSD."

Statement on Academic Freedom

"Institutions of higher education are conducted for the common good. The common good depends upon a search for truth and upon free expression. In this course the professor and students shall strive to protect free inquiry and the open exchange of facts, ideas, and opinions. Students are free to take exception to views offered in this course and to reserve judgment about debatable issues. Grades will not be affected by personal views. With this freedom comes the responsibility of civility and a respect for a diversity of ideas and opinions. This means that students must take turns speaking, listen to others speak without interruption, and refrain from name-calling or other personal attacks."
