Chemistry Lab Safety Rules and Information

Health and safety are paramount values in science classrooms, laboratories and field activities. You are expected to learn, understand and comply with ACC environmental, health and safety procedures and agree to follow the ACC science safety policy. You are expected to conduct yourself professionally with respect and courtesy to all. Anyone who thoughtlessly or intentionally jeopardizes the health or safety of another individual will be immediately dismissed from the day’s activity, may be withdrawn from the class, and/or barred from attending future activities. Specific safety training will take place before most activities. If you are late and miss this training, you will not be able to participate in the activity. You can read the complete ACC science safety policy at: http://www2.austincc.edu/sci_safe/.

Emergencies

- If there is a fire, major chemical spill or other emergency call the ACC Police Dispatch as soon as possible. Tell the officer your campus and exact location in the building.
  
  Location of nearest ACC phone: ______________________________________

  ACC POLICE DISPATCH:  222 (from an ACC phone)
  223-7999 (from a mobile or other phone)

- If evacuation is necessary, go to the designated rally point away from this building.
  
  Directions to nearest exit: ______________________________________

  Location of rally point: ______________________________________

Safety Equipment and Information:

- Information about chemicals used in this laboratory can be found in Material Safety Data Sheets (MSDSs) and in a chemical inventory located ____________.

- The emergency gas shut-off for this lab is located: _____________________________. Shut off the gas immediately if gas nozzles or valves are damaged, or if there is a fire.

- Fire extinguishers are located:  
  (1) ________________
  (2) ________________

  To use a fire extinguisher, pull the pin in the handle and squeeze the handle while pointing the nozzle at the base of the flame.

- Fire blankets are located:  
  (1) ________________
  (2) ________________

  If you are on fire, stop, drop and roll. Let someone else get the fire blanket.

- A safety shower is located _____________________________. If you spill a significant quantity of chemical, especially an acid or base on yourself immediately stand under the shower and pull the handle. Disrobe. The instructor will evacuate the room and close the doors for your privacy. Someone of your gender will stay to help you. Stand under the shower for at least 20 minutes. You will be given clothing after the shower.

effective 1/16/2008
updated 10/15/2007
• An eyewash is located ________________________________.
  If a chemical is splashed or rubbed into your eyes you must use an eyewash for
  at least 20 minutes with your eyes held open. Someone will help you with this.
• If a person is experiencing electrical shock from touching wires or equipment,
  use a belt or other non-conducting material to pull them away from the electrical
  source.
• First aid kits are located:  (1) ________________________________.
  (2) ________________________________.
  Only minor cuts and burns will be treated in the lab. Serious injuries must be
  treated in a medical facility. Emergency Medical Services (EMS) will be called if
  you are injured and are unable to take yourself to a medical facility.

Dress code and personal protective equipment (PPE)
  • While in the lab you must wear closed-toed shoes.
  • You must wear long pants or skirts (below the knee) or a lab apron/coat
    (provided).
  • You must wear goggles or safety glasses while chemicals or glassware are being
    used anywhere in the lab. All forms of safety eyewear must be marked with a
    “Z87” label and the lenses/shield must be colorless and otherwise un-tinted. You
    must bring you own safety eyewear; it will not be provided by ACC.
  • Wearing contact lenses in the lab is strongly discouraged. Students wearing
    contact lenses must wear safety goggles instead of safety glasses.
  • You must tie back any long hair in labs involving open flames.
  • Gloves are provided and can be worn for any lab activity. Your instructor will
    inform you when gloves are required rather than optional.
  • For your safety, we recommend that you:
    o avoid wearing loose clothing, especially long, loose sleeves.
    o wear natural fiber clothing because synthetic material melts onto skin in a fire.
    o remove watches, rings, and bracelets during lab activities involving
      chemicals.

Waste disposal
  • For chemical wastes, there are containers located ________________________________.
    Be sure you know which container to use for your experiment.
  • For other wastes, there are containers for
    o glass - located ________________________________
    o other trash - located ________________________________
  • You must precisely follow the waste disposal procedures. Never dispose of
    anything in lab without prior direction from the instructor.
Lab conduct

- DO NOT
  - horse around or perform unauthorized experiments.
  - eat, drink, or chew (tobacco or gum).
  - bring drinks or food (even in closed containers) into the lab.
  - pipet by mouth.
  - taste chemicals, or directly smell chemical fumes.
- You shall follow all procedures in manuals, in handouts, and as given by the instructor.
- You must store backpacks, coats, and other personal items (located ________________). We recommend that you bring as few items to lab as possible.
- Report broken glass and chemical spills to your instructor immediately.
- Chemistry students are not allowed to sit while experiments are being performed in the lab - even if there are stools/chairs available in the lab.

Lab hygiene

- You must clean up your individual work area/equipment and community work areas/equipment (e.g., sinks, balances).
- You must put lids back on bottles and containers immediately after use.
- Do not put excess chemicals back into original containers.
- Only dispose of chemicals and waste as directed by the instructor.
- Wash hands prior to leaving lab.
- Always assume the chemicals used in lab are corrosive or irritating. Any time chemicals come in contact with your skin, wash the affected area immediately.

Labeling

- You must label containers/test tubes if you are using more than one container per lab.
- Inform your instructor immediately if a label is damaged in any way.
- Read all labels and pay special attention to hazard information.

Disease

Blood-borne diseases, such as HIV and hepatitis, can be transmitted from person to person through contact with human blood. Follow the Universal Precautions whenever exposure to human body fluids is possible:

- Consider all body fluids (saliva, blood, etc.) as potentially infected.
- Do not touch or come into contact with anyone else’s body fluids.
