

**AUSTIN COMMUNITY COLLEGE
MEDICAL LABORATORY TECHNOLOGY
MLAB 2434 – Clinical Microbiology
Master Course Syllabus
Semester/Year**

Course Web Site: <http://www.austincc.edu/mlt/micro/micro>

Course Outline and Schedule: http://www.austincc.edu/mlt/coag/coag_schedule.html.

This schedule is tentative. Do NOT print the schedule until instructed by the professor. The schedule is subject to change. Any changes will be communicated by the professor.

Course Number and Name	Campus	Section	Synonym
MLAB-2434 Clinical Microbiology	Eastview		28314
MLAB-2434 Clinical Microbiology	Round Rock		30060

FACULTY INFORMATION		
Campus	Eastview	Round Rock Campus
Instructor		
Office		
Office Hours		
Phone		
Email		

COURSE INFORMATION		
Campus	Eastview	Round Rock Campus
Lecture Room	9213	3121.01
Laboratory	9101	3121.00
Lecture Time		
Laboratory Time		
Length of Course	11 Weeks	
Dates		

Students will access and print out course materials from the course web site. Assessment activities are provided as a means of assisting students in determining their level of competence in given areas as well as to assist in reviewing for examinations. Assignments will be posted to enhance the student's learning experience.

ACC EMAIL

All College e-mail communication to students will be sent solely to the student's ACCmail account, with the expectation that such communications will be read in a timely fashion. ACC will send important information and will notify you of any college related emergencies using this account. Students should only expect to receive email communication from their instructor using this account. Likewise, students should use their ACCmail account when communicating with instructors and staff. Instructions for activating an ACCmail account can be found at <http://www.austincc.edu/accmail/index.php>.

COURSE DESCRIPTION

Instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, quality control, quality assurance, safety, setup, identification, susceptibility testing, and reporting results.

PREREQUISITES

Enrollment in this course, successful completion of the Medical Laboratory Technology Program admissions process and department chair approval. Students must be accepted into the MLT Program. Special status students must have basic knowledge of microbiology.

INTRODUCTION/RATIONALE

This course consists of instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, setup, identification, susceptibility testing, and reporting procedures. The laboratory exercises will endeavor to provide the student with the most comprehensive experiences possible, but will rely mainly on the commonly measured differential characteristics of select bacterial groups.

COURSE GOALS

By the end of this course the student should be able to:

- Demonstrate proficiency in aseptic handling of bacteriologic specimens.
- Demonstrate an understanding of bacterial, viral and rickettsial descriptions and classifications.
- Choose the proper media for and correctly process bacteriologic specimens.
- Identify unknown organisms using techniques presented in laboratory exercises.
- Apply principals of safety, quality assurance and quality control.
- Evaluate specimen acceptability.
- Correlate test results with patient conditions.

COURSE OBJECTIVES

When you go to the course website each unit will have a set of objectives. Print these out and use them to study the course materials. Exam questions are created from the course objectives. Each laboratory exercise will have objectives. One helpful way to study is write the objective on an index card and write the information pertaining to that objective on the back. The following affective objectives pertain to the classroom and clinical components:

1. Demonstrate professionalism by
 - a. complying with the attendance policy
 - b. complying with the dress code
 - c. submitting assignments by the stated deadline
2. Demonstrate enthusiasm and interest in the profession of coagulation by asking questions, participating in class discussions and meeting with professors during office hours as needed.
3. Demonstrate initiative by reviewing objectives and completion of reading assignments prior to class.
4. Demonstrate progression in laboratory skills by effective organization, coordination of multiple tasks and insightful evaluation of results obtained.
5. Utilize constructive criticism to correct deficiencies and improve performance.
6. Work cooperatively with professors and fellow students to achieve the goals of each activity assigned.
7. Participate in activities designed to advance the profession of CLS and build professional pride.
8. Participate in activities to encourage an ongoing involvement in professional development.

COURSE MATERIALS

Required

- Sharpie permanent marking pen
- Scrubs - appropriately fitting and professional in appearance.
- Gloves – latex or nitrile NOT vinyl
- Digital timer capable of counting seconds
- Notebook
- ✓ **All laboratory exercises and study questions must be organized, preferably in a binder or notebook, for validation by the instructor.**
- Mahon, Connie R., and Manuselis, George, *Textbook of Diagnostic Microbiology*, Fourth Edition, W. B. Saunders, ISBN 978-1-4160-6165-6 (Available in EVC and RRC Bookstore)
- MLAB 2434 Course Outline/Objectives and Lab Manual (Available off MLT website)
- MLAB 2434 Power Point Presentations (Available off MLT website)
- Recommended: Medical Dictionary and General Laboratory Test Interpretation book

SCANS COMPETENCIES

Recently the U.S. Department of Labor established the Secretary's Commission on Achieving Necessary Skills (SCANS) to examine the demands of the workplace and whether the nation's students are capable of meeting those demands. The Commission determined that today's jobs generally require competencies in the following areas.

- a. Resources: Identifies, organizes, plans, and allocates resources
- b. Interpersonal: Works with others
- c. Information: Acquires and uses information
- d. Systems: Understands complex interrelationships
- e. Technology: Works with a variety of technologies

The Texas Higher Education Coordinating Board is now requiring all degree plans in institutions of higher education incorporate these competencies and identify to the student how these competencies are achieved in course objectives.

Examples of SCANS competencies being incorporated are as follows:

SCANS COMPETENCY	Clinical Microbiology Competencies
Resources	Identify reagents and supplies needed for each lab, organize work so that the reagents, supplies, and equipment are utilized appropriately and work is completed within a reasonable time frame.
Interpersonal	Recognize limitations of expertise during the performance of procedures and communicate with instructor when problems arise. Maintain confidentiality of patient samples utilized. Demonstrate respect for fellow students during class and lab time. Utilize the Internet to interact with laboratory science students through the Blackboard communication system and regular email programs.
Information	Apply knowledge gained from lecture, laboratory and the textbook to troubleshoot and problem solve laboratory results obtained during student laboratory. Utilize the Internet and other library resources to acquire information about specific topics as they relate to the field of Clinical Laboratory Science.
Systems	Apply critical thinking skills to clinical laboratory problems encountered, specifically, utilizing clinical laboratory principles and theories and applying these to results obtained.
Technology	Achieve competency in routine clinical laboratory procedures utilizing a variety of reagents, supplies and techniques. Utilize provided procedures to obtain appropriate information for performing and trouble-shooting clinical laboratory procedures, and determining clinical significance and normal values. Use computers, the Internet, and the Blackboard system to access course materials and other relevant course information.

PROGRAM STUDENT LEARNING OUTCOMES

Upon completion of the **Associate of Applied Science degree in Medical Laboratory Technology**, the student will be able to:

1. Collect and process biological specimens for analysis.
2. Perform analytical tests on body fluids, cells, and products.
3. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when corrections are indicated.
4. Monitor quality control within predetermined limits.

5. Perform preventive and corrective maintenance of equipment and instruments or refer to appropriate source for repairs.
6. Demonstrate professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals, and with the public.
7. Recognize the responsibilities of other laboratory and health care personnel and interact with them with respect for their jobs and patient care.
8. Apply basic scientific principles in learning new techniques and procedures.
9. Relate laboratory findings to common disease processes.

INSTRUCTIONAL METHODOLOGY

- Lecture and Power Point Presentations
- Blackboard On-line Course System (<http://acconline.austincc.edu/>)
- Laboratory Practice
- Audio-Visual Materials
- Internet Resources
- **Supplemental Training Software**

<http://www.medtraining.org/corporate/default.aspx>

You are already entered as a user for this software. If you have forgotten your log-in and/or password information, contact Keri or Joanna.

BLACKBOARD ON-LINE SYSTEM

A considerable portion of this course will be conducted via the computer on-line Blackboard learning system. All students will be required to have an email address and to access course materials, learning activities, and exams on-line. Students may use their home computers OR may access all materials and take exams at any public computer, including those in Learning Labs and libraries at all ACC campuses.

How to Log Into Blackboard

1. To access Blackboard, go to <http://acconline.austincc.edu/>
2. Enter your ACCeID and ACCeID Password in the provided boxes, and then click on the "Login" button.
3. Access your course(s) by clicking the course title located in the My Courses module.
4. ACC Blackboard support website is <http://irt.austincc.edu/blackboard/>.

ATTENDANCE POLICY: LECTURE AND LAB

It is the student's decision to take this class. Therefore, once the student makes this decision, he/she has responsibilities to everyone else in the community of learners. Excellent attendance and punctuality are key behaviors which demonstrate responsibility and commitment to a successful learning experience. It is this commitment to learning that will enable the student to progress satisfactorily towards completion of course goals and objectives. Additionally, we want the student to set a pattern of professional behavior which mirrors the attendance expectations in the true clinical environment.

Regular and punctual attendance is required at all lecture and lab sessions. Class roll will be taken during each class period.

Tardiness to class is strongly discouraged. Important announcements are made at the beginning of class which may not be repeated.

Notification of your absence, by phone or email must be provided to your instructor in a timely manner, preferably 30 minutes prior to class but within 2 hours of the class start time. Attendance demonstrates professionalism and regular and punctual attendance is the expectation in the professional workplace setting. Due to the nature of our courses, each class serves as a building block of knowledge for the next class session. Each student is responsible for making up all assignments, materials, examinations etc. when absent from class. All missed lab exercises must be completed to verify completion of the course objectives. Make-up exercises or alternative learning experiences will be planned according to the limits set by the instructor. However, the amount of credit awarded for the exercise, will be no greater than

80%. Once a student has incurred 2 absences, for whatever reason, the progressive discipline policy will be initiated:

- 2 absences- verbal conference with instructor that will define what policy is not being met, as well as set up an action plan with a follow up conference date
- 4 absences- conference report with instructor stating what actions will be necessary to avoid probation
- 5 absences- probation
- Withdrawal- terms of probation were not met

Withdrawal is based on absences equal to or greater than 25% of the material.

The attendance policy is subject to review and modification by department officials.

COURSE REQUIREMENTS, EXAMINATION AND GRADING

Time Commitment

According to "*Hints on How to Succeed in College Classes*" <http://tinyurl.com/3dgegqz> you should budget your time per week for this four hour credit course as follows:

1. Reading assigned text 2 to 3 hours
2. Homework assignments 3 to 6 hours
3. Time for review and test preparation 3 hours
4. Total study time per week 9 to 13 hours **PER WEEK**

Instructor Recommendations

Due to the hybrid nature of this course, the instructor recommends that the student follow the below process in preparation for each class day:

1. Print out and review the course objectives.
2. Print out the Powerpoint in note form.
3. Listen to the presentation and take notes as appropriate.
4. Write down questions that you have as you review the material.
5. Look the questions up in the required textbook or review the PowerPoint slides again.
6. If you are still confused on a concept or principle, submit the question(s) when you walk into the classroom and these questions will be used as discussion items during the "guided lecture."
7. As soon as you start to get lost in understanding the material, do not wait to speak with the instructor. Make an appointment or email her as soon as possible.

Dress Code

The student will be expected to attend class clean and neatly dressed and wear closed-toe shoes. A disposable laboratory coat will be issued to each student and must be worn snapped during all laboratory sessions. Hair that is shoulder length or longer **must** be worn up or securely tied back. Gloves must be worn when handling biological materials.

Behavioral Conduct

While a student is representing Austin Community College as a Medical Laboratory Technology student, they will be expected to conduct themselves in such a manner as to reflect favorably on themselves and on the Program. If a student acts in such a manner as to reflect immature judgment or disrespect for others, the student will be called before the MLT Department Chair for determination of their status in the Program. Inappropriate conduct is grounds for activation of the Progressive Discipline Policy (Warning, Conference, Probation, Withdrawal) and may be cause for immediate probation or dismissal from the Program.

STUDENT EVALUATION

Measurement, Written

Approximately six (6) examinations will be given in Blackboard over lecture material covering lecture and the accompanying laboratory exercises, and will comprehensively assess the student's knowledge of

concepts, principles, techniques and procedures as related to the instructional material. **These exams will be taken in Blackboard and will be timed. Each student is on the honor system to not use unauthorized materials while taking these exams.** There will be **no routine retests given**. If a student misses one exam, the grade of the final exam will be averaged in the place of the missed exam grade. If any other exams are missed, grades of "0" will be given.

Measurement, Practical

Points are awarded for the successful completion of laboratory exercises, as detailed in the learning objectives for each laboratory.

All laboratory exercises **must** be read **before** attending the laboratory period. A short pre-lab assessment may be given over the scheduled lab immediately prior to the lab.

Student laboratory performance is evaluated using the following criteria:

1. Familiarity with the procedure.
2. Setting up and performing the procedure (organizational skills).
3. Appropriate specimens and reagents are obtained and utilized.
4. Proper use of equipment, reagents, supplies and specimens.
5. Proper labeling, handling and disposal of specimens, tubes, etc.
6. Organization and performance of individual tasks.
7. Completion of tests within a reasonable amount of time.
8. Clean up of work area.
9. Correct interpretation of results with recognition of discrepancies or abnormal results being brought to the instructor's attention.
10. Results are recorded and reported in proper format.
11. Results of laboratory pre-tests.
12. Proper response to study questions. **Laboratory study questions must be turned in on time.** Unless otherwise noted, lab study questions are due the week following the lab procedure. If you are absent for the lab you are still required to submit the completed study questions at the beginning of the next class period.
13. Results of laboratory unknowns.

Determination of Final Grade

Lecture- 2/3 of final grade

Exams in Blackboard= 50%
Quizzes=10%
Class Project= 5%
Final in class= 35%

Laboratory – 1/3 of final grade

Laboratories = 35%
Unknowns = 50%
Study Questions= 5%
Assignments= 5%
Medtraining= 5%

Late Work

- For each day that the late assignment/lab is not turned in, **5 points per day will be deducted.**
- Any assignment/lab turned in after one week will still be corrected; however, a grade a "0" will be given.
- **Laboratory classes will NOT be repeated.** The student will receive a grade of "0" for missed labs. However, the study questions can be turned in for half credit, not to include points missed on the activity.

Grading System

A passing grade (75% or better) is **required** in both the lecture and laboratory components in order to receive a passing grade for this course.

- A = 90-100%
- B = 80-89%
- C = 75-79%
- D = 60-74%
- F = 59% and below

Incomplete = To receive an I, a student must have a **passing average** (75% or better) and have completed at least 80% of the course work. An instructor may award a grade of "I" (Incomplete) if a student was unable to complete all of the objectives for the passing grade in a course. An incomplete grade cannot be carried beyond the established date in the following semester. The completion date is determined by the instructor but may not be later than the final deadline for withdrawal in the subsequent semester.

WITHDRAWAL POLICY

It is the responsibility of each student to ensure that his or her name is removed from the roll should he or she decides to withdraw from the class. The instructor does, however, reserve the right to drop a student should he or she feel it is necessary. If a student decides to withdraw, he or she should also verify that the withdrawal is submitted before the Final Withdrawal Date. The student is also strongly encouraged to retain their copy of the withdrawal form for their records.

Students who enroll for the third or subsequent time in a course taken since Fall, 2002, may be charged a higher tuition rate, for that course.

State law permits students to withdraw from no more than six courses during their entire undergraduate career at Texas public colleges or universities. With certain exceptions, all course withdrawals automatically count towards this limit. Details regarding this policy can be found in the ACC college catalog.

SCHOLASTIC DISHONESTY

A student attending ACC assumes responsibility for conduct compatible with the mission of the college as an educational institution. Students have the responsibility to submit coursework that is the result of their own thought, research, or self-expression. Students must follow all instructions given by faculty or designated college representatives when taking examinations, placement assessments, tests, quizzes, and evaluations. Actions constituting scholastic dishonesty include, but are not limited to, plagiarism, cheating, fabrication, collusion, and falsifying documents. Penalties for scholastic dishonesty will depend upon the nature of the violation and may range from lowering a grade on one assignment to an "F" in the course and/or expulsion from the college. See the Student Standards of Conduct and Disciplinary Process and other policies at <http://www.austincc.edu/current/needtoknow>

Academic dishonesty such as, but not limited to, the following may result in IMMEDIATE dismissal from the MLT program and withdrawal from all MLT courses. If the withdrawal date has passed the student will be given a "D" for each course.

1. Submitting homework assignments copied from others. Both the student and the student that the materials were borrowed from will receive a "0" for the assignment and may be subject to the Academic Dishonesty Process and dismissal from the program.
2. Falsifying laboratory results.
3. Printing out examinations.

FREEDOM OF EXPRESSION/STUDENT RIGHTS AND RESPONSIBILITIES

Students at the college have the rights accorded by the U.S. Constitution to freedom of speech, peaceful assembly, petition, and association. These rights carry with them the responsibility to accord the same rights to others in the college community and not to interfere with or disrupt the educational process. Opportunity for students to examine and question pertinent data and assumptions of a given discipline, guided by the evidence of scholarly research, is appropriate in a learning environment. This concept is accompanied by an equally demanding concept of responsibility on the part of the student. As willing partners in learning, students must comply with college rules and procedures.

Each student is strongly encouraged to participate in class. In any classroom situation that includes discussion and critical thinking, there are bound to be many differing viewpoints. These differences enhance the learning experience and create an atmosphere where students and instructors alike will be encouraged to think and learn. On sensitive and volatile topics, students may sometimes disagree not only with each other but also with the instructor. It is expected that faculty and students will respect the views of others when expressed in classroom discussions.

AUSTIN COMMUNITY COLLEGE SAFETY

Austin Community College is committed to providing a safe and healthy environment for study and work. You are expected to learn and comply with ACC environmental, health and safety procedures and agree to follow ACC safety policies. Additional information on these can be found at <http://www.austincc.edu/ehs>.

Because some health and safety circumstances are beyond our control, we ask that you become familiar with the Emergency Procedures poster and Campus Safety Plan map in each classroom when on campus and at the clinical site when you are at clinical. Additional information about emergency procedures and how to sign up for ACC Emergency Alerts to be notified in the event of a serious emergency can be found at <http://www.austincc.edu/emergency/>.

You are expected to conduct yourself professionally with respect and courtesy to all. Anyone who thoughtlessly or intentionally jeopardizes the health or safety of another individual will be immediately dismissed from the day's activity, may be withdrawn from the class, and/or barred from attending future activities.

STUDENT ASSISTANCE POLICY

It is the sincere desire of the program faculty to aid each student in developing his/her professional potential. Academic, clinical, and those personal problems that interfere with the student's development are of concern to the faculty. The program faculty has adopted the following policy:

➤ **Personal Problems**

The MLT student should feel free to make an appointment to discuss problems of a personal nature with a faculty member of his/her choice. In addition, the Health Science counselors are available for the student for additional counseling, if necessary.

➤ **Academic Problems**

Problems encountered in the MLT lecture and/or laboratory sections should be brought to the attention of the course instructor. The instructor will work with the student to resolve the problem. If the student feels he/she cannot reach an agreement with the instructor, the student with the instructor should present the situation to the Program Director. All discussions with the faculty will remain confidential.

PROMOTION, FAILURE, AND/OR DISMISSAL FROM THE DEPARTMENT

1. A minimum grade of "C" (75%) is required in **both the lecture and laboratory components** of all medical laboratory technology courses. Failure to meet the minimum passing score in each area will result in a grade of "D" for the course.
2. A student who withdraws from this course will be withdrawn from all co-requisite MLT courses.

3. Failing this course will result in the student being withdrawn from the MLT program and all co-requisite MLT courses. The student will have an Exit Interview and be offered one additional admission. All MLT course work must be repeated.
4. A student who withdraws from the program or fails to achieve the minimum course grade for the progression may be re-admitted one time only to the MLT program upon the recommendation of the MLT Program Admissions Committee and according to the criteria outlined in the *MLT Student Handbook*.
5. Any student may be dropped from the program due to excessive absences and/or consistently failing to meet class assignments, for disruptive conduct during lecture or lab or for displaying conduct detrimental to the ethics of medical laboratory technology.
6. A minimum grade of "C" (75%) is required in all Medical Laboratory Technology courses. Failure to meet the minimum passing score will result in termination from the program. Students must submit a written letter requesting readmission to the program. Re-admitted students are conditionally accepted and may be required to audit or repeat previous course work as determined by the Admissions Committee. Please refer to the *MLT Student Handbook* for specific policies.
7. The student may utilize the "Student Grievance Procedure of Austin Community College" in the disposition of a grievance or complaint without fear of recrimination or retaliation as outlined at <http://www.austincc.edu/current/needtoknow/policies.php#complaints>
8. The MLAB faculty understands that learning in group situations can be beneficial. However, each student is expected to demonstrate their own competency by doing their own work. **Any student caught plagiarizing (assigned abstract and laboratory study questions), cheating on examinations, during laboratory practicals, or sharing laboratory results will be subject to disciplinary action outlined.** See the Student Standards of Conduct and Disciplinary Process and other policies at <http://www.austincc.edu/current/needtoknow> **This includes, but is not limited to, academic penalty and possible withdrawal from the program.**

STUDENTS WITH DISABILITIES

Each ACC campus offers support services for students with documented disabilities. Students with disabilities who need classroom, academic or other accommodations must request them through the Office for Students with Disabilities (OSD). Students are encouraged to request accommodations when they register for courses or at least three weeks before the start of the semester, otherwise the provision of accommodations may be delayed.

Students who have received approval for accommodations from OSD for this course must provide the instructor with the 'Notice of Approved Accommodations' from OSD before accommodations will be provided. Arrangements for academic accommodations can only be made after the instructor receives the 'Notice of Approved Accommodations' from the student.

Students with approved accommodations are encouraged to submit the 'Notice of Approved Accommodations' to the instructor at the beginning of the semester because a reasonable amount of time may be needed to prepare and arrange for the accommodations.

Additional information about the Office for Students with Disabilities is available at <http://www.austincc.edu/support/osd/>

SPECIAL LABORATORY REQUIREMENTS

1. It is the responsibility of the student to come prepared for each laboratory session by reading the procedure **prior** to the laboratory session.
2. A pre-test may be given at the beginning of each lab exercise to ensure readiness to perform the procedure.
3. Each student is responsible for their own work. If you are having difficulty with a particular procedure **do not bother students around you**. Any questions you have about the procedure, reagents or supplies should be directed to the instructor.
4. **Talking is strongly discouraged during laboratory exercises.**

5. Each student is responsible for cleaning up their work area. This will be closely monitored by the instructor.
6. The use of electronic devices during lecture and laboratory is prohibited. This includes the use of cell phones and MP3 players.

LABORATORY SAFETY REGULATIONS

Standard Precautions

Since medical history and examination cannot reliably identify the infectivity of all patients' blood and body fluids, universal precautions should be followed for all patients. The concept of universal precautions was first introduced in 1987 by the Centers for Disease Control (CDC) to decrease the occupational risks of blood-borne diseases such as AIDS and hepatitis B to healthcare workers. The application of universal precautions is continually evolving; all body fluids may soon be handled with the same precautions as blood. This further application is already occurring in some labs, and is known as Body Substance Isolation. Precautions specific for clinical laboratories:

Use barrier protection routinely to prevent skin and mucous membrane contamination with blood or other body fluids.

1. Wear gloves:
 - a) When cuts, scratches, or other breaks in skin are present.
 - b) When performing phlebotomy.
 - c) When collecting capillary blood specimens.
 - d) Anytime it appears that contamination of the hands may occur.
 - e) Change gloves after each patient contact or when visibly contaminated with blood.
2. Wear a mask, eye glasses or goggles, or face shield during procedures that are likely to generate droplets of blood or other body fluids to prevent exposure of the mucous membranes of the mouth, nose, and eyes.
3. Wear a fluid-resistant gown, apron, or other covering when there is a potential for splashing or spraying of blood or body fluids onto the body.
4. Wash hands or other skin surfaces thoroughly and immediately if contaminated with blood or other body fluids.
5. Wash hands immediately after gloves have been removed even when no external contamination has occurred. Organisms on the hands multiply rapidly in the warm moist environment within the glove.
6. Handle laboratory instruments, especially needles and scalpel blades, with extreme caution.
7. Place used needles, disposable syringes, skin lancets, scalpel blades, and other sharp items into a puncture-resistant biohazard container for disposal. The container should be located as close as possible to the work area. Phlebotomists should carry puncture-resistant containers with them on their phlebotomy tray.
8. Needles should not be recapped, purposely bent, cut, broken, removed from disposable syringes, or otherwise manipulated by hand. If recapping is unavoidable (blood gas syringes, etc.), do it with one hand and use great caution.
9. Place large-bore reusable needles (bone marrow, biopsy needles, etc.) and other reusable sharp objects into a puncture-resistant container for transport to the reprocessing area.
10. Use mouth pieces, resuscitation bags, or other ventilation devices during emergency resuscitation procedures.
11. Exudative lesions or weeping dermatitis should be covered with an occlusive dressing to prevent contamination.
12. All specimens of blood and body fluids should be put in well-constructed containers with secure lids to prevent leaking during transport. Care should be taken when collecting each specimen to avoid contaminating the outside of the container and the laboratory form accompanying the specimen.
13. Use biological safety hoods (Class 1 or 2) for procedures that have a high potential for generating droplets (e.g., blending, sonicating, and vortexing).
14. Fill evacuation tubes, vials, and bottles by using their internal vacuum only. If a syringe is used, the fluid should be transferred to an evacuation tube by puncturing the diaphragm of the rubber

- stopper and allowing the correct amount of fluid to flow slowly into the tube along the wall. The tube should not be hand held when puncturing the top. Never force fluid into an evacuation tube by exerting pressure on the syringe plunger.
15. Use mechanical pipettes for manipulating *all* liquids (including body fluids, chemicals, or reagents) in the laboratory.
 16. Decontaminate all laboratory work areas with an appropriate chemical germicide after a spill of blood or other body fluids and when work activities are completed. Laboratory countertops should be disinfected at least once per shift.
 17. Rinse off all body fluids from reusable contaminated equipment prior to reprocessing according to your institution policies.
 18. Clean and decontaminate scientific equipment that has been contaminated with blood or other body fluids before being repaired in the laboratory or transported to the manufacturer. Always follow manufacturer's recommendations.
 19. Pregnant laboratory workers are not thought to be at greater risk of infection than others in the laboratory. However, if an infection does develop during pregnancy or the mother is a carrier prior to the pregnancy, the infant is at risk of infection by perinatal transmission. Therefore, pregnant laboratory workers should be especially aware of universal precautions.
 20. Microscopes will be assigned. They must be cleaned and properly stored or points will be deducted from lab grade.

GENERAL COMMENTS

Most exercises will take 2 or 3 laboratory periods to complete (i.e., gathering data from previous inoculation). It will be necessary, therefore, to bring each laboratory exercise to every laboratory period.

Each person will be responsible for his own work (no sharing results) and for cleaning up his own work area.

Open laboratory hours will be posted and are subject to instructor availability.

Clinical Microbiology (MLAB 2434)
Statement of Understanding

Please write your first name and last initials on EACH LINE which confirms that you have read and understand the MLAB 2434 Course Syllabus including:

- _____ Course Goals
- _____ Course Requirements and Regulations
- _____ Time Commitment
- _____ Dress Code
- _____ Evaluation Criteria for Lecture and Lab
- _____ Late/missed work policy
- _____ Attendance Requirements
- _____ Requirements for Promotion, Failure and Dismissal from the Program
- _____ Policies, procedures and requirements for clinical practice, with special emphasis to those referring to safety

I agree to abide by all of the policies, procedures and requirements stated within.
