

Hunting Tag

Biol 1409 Scavenger Hunt

(If actual specimen is required,
staple or tape this sheet to your specimen)

Name: _____

Semester: _____

Kingdom: _____

SH Item Number: _____

To receive full credit for the items you bring in, you must adhere to the following rules:

- You collect and bring in your OWN samples (this is not a shared lab activity)
- you bring them in on the **correct day** as indicated by the packet & syllabus
- You must collect two *different* numbered items for each of the 5 kingdoms or groups
- each items must be accompanied by a separate "Hunting Tag"
- you cannot *purchase* items *unless* it is specifically permitted in the instructions
- you will not get your credit unless you bring in *exactly* what is asked for and answer the appropriate questions; that means you need to make sure you know exactly what to collect - do some research, look it up, don't just guess and bring in something remotely like what is asked for and expect to get credit for it
- use common sense when collecting; eg. don't bring in anything that might endanger the class (eg live pathogens or parasites, venomous animals, poison ivy, etc), don't kill vertebrates just to collect for this project, don't steal nests that are "in use", don't violate laws and bans on hunting or collecting certain lifeforms, eg. we don't want any endangered species, etc;
- you will not get these items back so don't bring in a family treasure – the idea is that you actually get out into the *real* world and try to *find* this stuff yourself.

Drawings, Descriptions, Written Materials, as required:
