

Course Syllabus/Outline Development Form

[ITSE 6084]

1. NAME OF COURSE:

Case Study on Localization

2. NUMBER OF CLOCK HOURS:

8 hours

3. COURSE DESCRIPTION:

This case study will provide an overview of some real-world localization problems and the solutions employed to maximize development efficiency. The course will consist of lecture, discussion, and examples. There are no prerequisites. It would be helpful if the audience were familiar with the localization process.

4. COURSE OBJECTIVES:

- a. Discuss some common localization problems
- b. Describe the importance of cross team “effective” communication
- c. Discuss how development problems can affect the localized software process

5. RATIONALE:

As the importance of localized software has increased there is a continued need to reduce time to market and improve product quality. An effective software development process can help increase the efficiency of localization. This course introduces localization professionals to some solutions of some common problems faced in the localization process.

6. REQUIRED MATERIALS:

Students will be provided with handouts by the instructor.

7. EVALUATION:

1. Class participation
2. Attendance
3. CEUs: 0.8

8. COURSE OUTLINE:

Topic	Sub-topics	Number of hours
1. Introduction	1.A. JJ's Graphics Company	1
	1.B. Localization R Us Company	
2. Project Team Meeting	2.A. Development Status	4
	2.B. Functional Test Status	
	2.C. Localization Test Status	
3. Analysis	3.A. Identification of Problems	3
	3.B. Corrective Actions
