This PSMA allows you to contact our Technical Support team every time you have a technical question. It will also entitle you to receive free updates and upgrades within one year. SDL Trados Studio 2009 Student Edition*

From September 1st 2010, we have introduced the SDL Trados Studio 2009 Student Edition. This new version is similar to [SDL Trados Studio 2009 Freelance](#), however it includes a download, but not a license, of SDL Trados 2007 Suite. This is due to the increasing number of requests from translation agencies and corporations for students to be actively using the latest version of SDL's leading translation memory software.

What does this mean?

With the SDL Trados Studio 2009 Student Edition, users will have:

- Full access to SDL Trados Studio 2009 Freelance
- Full access to SDL MultiTerm 2009
- The ability to open, edit and save .ttx or .itd bilingual files sent from earlier SDL Trados versions
- The ability to upgrade SDLX or Translator's Workbench translation memories (TMs)

However, users will not be able to:

- Create new .ttx or .itd bilingual files (users will be able to create.xliff bilingual files)
- Translate within TagEditor
- Create translation memories in Translator's Workbench or SDLX
- Access WinAlign to create new translation memories from previously translated content
