Registering for MyMathLab On-Campus Fall 2012

Go to http://pearsonmylab.com/ to start the registration process. At the end of the registration process, you can enter your course.

Course ID

Make sure you use the course ID for the right class.

</table>

ACC email address

You need an email address to register for MyMathLab. For this and all other ACC-related activity, you should use your ACC student email address. If you have not set this up already, visit http://www.austincc.edu/accmail/ for instructions. If you do not check this account regularly, set it up to forward to an email address that you do check. Instructions for doing this are included at the above link.

Form of payment

Use an access code

Any new textbook for the course, either hard bound or loose-leaf, purchased at an ACC bookstore, includes a MyMathLab access code. Student access codes can also be purchased separately at ACC bookstores.

Use a credit card or PayPal

Access to the course may instead be purchased online during the registration process. This is a good option if you do not intend to purchase a physical copy of the textbook.

Get temporary access without payment for 17 days (link)

Temporary access is also available, for students who wish to get started in the course before providing payment. A form of payment will be required after 17 days.

Purchasing options

You may purchase MyMathLab access without a printed copy of the textbook, because the software includes access to the textbook in pdf form. Before choosing this option, you should be realistic about whether it would be helpful to you to have a printed copy of the textbook to look through while studying.

It is not recommended that you purchase a used textbook, or a textbook from a different bookstore. MyMathLab access is generally not included in either of these cases, and therefore you will still have to purchase MyMathLab access separately. If you plan to use a physical copy of the textbook, it is usually more cost-effective to purchase it new at an ACC bookstore, as it will include a MyMathLab access code.
About MyMathLab

MyMathLab is an interactive online resource that accompanies the text. It includes a copy of the textbook in pdf form.

Included in MyMathLab

- Online access to all pages of the textbook
- Exercises tied to homework problems in the textbook
- Multimedia learning aids (videos & animations) for select examples and exercises in the textbook
- Practice tests and quizzes linked to sections of the textbook
- Personalized study guide based on performance on practice tests and quizzes

Visit www.mymathlab.com for more information.

Minimum Computer Requirements

- Internet connection: Cable/DSL, T1, or other high-speed for multimedia content; 56k modem (minimum) for tutorials, homework, and testing.
- Memory: 64 MB RAM minimum
- Monitor resolution: 1024 x 768 or higher
- Plug-ins: You need certain plug-ins and players from the MyMathLab Browser Check or Installation Wizard (found inside your course).

For more information, visit the site http://www.mymathlab.com/system.html from the computer on which you intend to work.
