Connecting the Projector and Laptop

Gather all the pieces before you begin connecting each item. This will ensure that all pieces are available for use.

Laptop and Power Cord

Let's begin connecting....connect everything before plugging in any power cords or booting up the projector or laptop.

Questions? Please contact Dr. Lara Niles, Professional Development Design Specialist, 223-7784 or lniles@austincc.edu.
Once you have connected all the cables, plug in the power cords. Turn on both the projector and the laptop.

You must toggle between FN/F8 on the laptop in order for the monitor to register through the projector. You may need to do this up to three times. If you are having difficulties, I would recommend powering down the laptop and rebooting...you can leave the projector on when you do this step.

Questions? Please contact Dr. Lara Niles, Professional Development Design Specialist, 223-7784 or lniles@austincc.edu.
Remember to open the window for the projector.

Now you should be able to view the laptop monitor through the projector.
