

Test 3 (over the Systems module, Lessons 1-6 and the Exponential module, computation of logs and Lesson 10.) In the NRG Testing Center. Deadline: Monday, May 3.

Module 4. Data and Graphs.

Objectives:

1. Read data from tables, bar graphs, line graphs, and pie charts.
2. Answer questions about the data using the graphs, tables, and numbers and percentages calculated from those.

We're trying something new for this module. We will work through the nine assignments listed below in class. Your homework each day is to carefully write the solutions to the assignments we did in class, showing your work. Then at the time of Test 4 (in class on Wed May 12) you will turn in all of this in a notebook, and, if it is correct and complete, you'll be able to replace 10 points worth of missed problems on the test with 10 points earned for turning the complete set of these in then.

For the quiz, each day I will give a problem on the board in class and ask you to do that and turn it in. While you are doing the quiz, you will put your worked-out solutions to the last class material on your desk so that I can look at it.

Grading: If you have the worked-out solutions from the previous class, you earn 2 points. If you attempt the problem in class, you earn 1 point. If you work the problem correctly, you earn 1 more point, for a total of 4 possible points on the quiz for that day.

Here is the complete set of assignments and my expected day we will cover it. Bring this list to class each day.

Assignment	In class on	Classwork/assignment exercises	
1	Mon 4/26	Lesson 1, page 114-115. Homework. Exercises 5-12	
2	Mon 4/26	Lesson 3, pages 128-129. Activity 1. Exercises 1-6	
3	Wed 4/28	Lesson 3, pages 130-131. Activity 2. Exercises 1-6	
4	Wed 4/28	Lesson 3, pages 132-133, Homework 1-4	
5	Wed 4/28	Review of percents: Lesson 1, page 116, 13.	
6	Mon 5/3	Lesson 7, pages 167-168, Activity 3. 1-5	
7	Mon 5/3	Lesson 7, pages 170-171, Homework 5abcdef	
8	Mon 5/3	Lesson 8, pages 176-177, Homework 5acde	
9	Wed 5/4	Lesson 11, pages 192-193. Homework 6abcde (Requires looking at units carefully.)	

Mon. May 3. Deadline for Test 3 in Testing Center

Mon. May 10. Review and wrap-up

Wed. May 12. Test 4 in class.
