

Module 1: Linear formulas, Problem Solving, and Logic

Test Review:

As you are reviewing for the test, here's what to work on, in this order:

1. All daily quiz problems.
2. All homework problems.
3. Additional problems identified on this page. Choose problems from this

Additional practice problems.

Some students wanted additional practice problems.

I am not giving additional practice problems on linear formulas at this time. Simply be sure that you can work all quiz and homework problems.

In the Problem Solving chapter, I have identified eight even-numbered problems for you. Solutions are provided on the course answer page.

In the Logic Chapter, I have identified all the problems in the Chapter Review and Chapter Test which are relevant to the types of problems we covered. Some of those are odd-numbered problems and the answers are in the back of the book. For the even-numbered problems, solutions are provided on the course answer page.

Linear formulas:

No additional problems.

Problem Solving:

Problem-Solving: Lesson 1, pages 15-17, problems 34, 44, 50

Problem-Solving: Lesson 2, pages 23-26, problems 8, 16, 18

Problem Solving: Chapter Test, pages 36-37 : 2, 8

Logic:

Chapter Review pages 95-96:

Section 1: 1, 2, 3, 4.

Section 2: 8, 9a

Section 3: 12, 13

Section 4: 14.

Chapter Test pages 96-97: 1, 2, 3, 4, 9, 10, 12, 16
