Where did “Closing the Gaps” come from?

Closing the Gaps was adopted in October 2000 by the Texas Higher Education Coordinating board (THECB) to close gaps in student educational achievement in Texas and between Texas and other states by 2015. The plan has four specific goals: “to close the gaps in student participation, student success, excellence and research.” Each goal in the plan includes intermediate targets for assessing progress toward the goals. In addition to the statewide goals and targets established in the plan, higher education institutions submit their own targets, all of which are available on the THECB website. How is ACC doing?

ACC is fully committed to the Closing the Gaps initiative and anticipates continued enrollment growth through 2020. However, due to the instability of the current economic environment, enrollment trends are somewhat erratic. So far, ACC has been able to meet and often surpass its goals through opening new campuses or centers and creative solutions such as Weekend College, expansion of distance learning programs, and development of hybrid courses (Chart 1). The Closing the Gaps goals of increasing access and success of students, particularly for underrepresented populations, are aligned with the College’s Master Plan goals. In support of these goals, ACC instituted the Student Success Initiative in 2009. This data-driven initiative brings together all of the student access and success activities of the College, including participation in the national Achieving the Dream initiative. The underlying principles of the Student Success Initiative are (1) to use data to guide continuous quality improvement in programs and support services and (2) to increase student achievement (equity of success) regardless of age, gender, ethnicity, race or socio-economic status.

Minority Headcounts

In fall 2012, Hispanic student enrollments remained relatively stable, decreasing less than 1% from fall 2011. Black student enrollments in fall 2012, however, decreased 7.4% from fall 2011. ACC continues to remain fully committed to focus its efforts on recruitment and retention of all students with particular attention to minority students. (Source: CBM001)

Early College Start & College Connection Headcount

Headcounts for Early College Start in fall 2012 increased by 16.5% from fall 2011, continuing a steady increase since fall 2008. College Connection enrollment in fall 2012 decreased by 3.6% from fall 2011. Both Early College Start and College Connection programs illustrate Austin Community College District's commitment to provide education opportunities in the Central Texas Region. Completions

ACC continues to be on target to meet its completion goals. In Academic Year 2012, ACC reached 72.5% of its projected 2020 targets for all degrees and certificates. The number of degrees and certificates awarded increased for White, Black and Hispanic students. Among these three groups, Black students had the largest percent increase in degrees and certificates awarded. (Table 1)

ACC has focused attention on increasing the number of Associate Degrees awarded. The current targets for Associate Degrees and the increase in the number of Associate Degrees awarded is reflective of this effort. In Academic Year 2012, ACC reached 68.5% of its projected 2020 target for Associate Degrees to be awarded. Examination of Associate Degrees awarded by race/ethnicity revealed that White students are currently at 76.0% of the 2020 targets. Black and Hispanic Students are at 64.8% and 59.5%, respectively. In Academic Year 2012, the number of technical degrees and certificates increased from 2011. As of 2012, ACC is at 73.3% of its projected 2020 target for the total number of technical degrees and certificates awarded. Continuing to increase the number of technical degrees and certificates awarded is a high priority for ACC, given the increased employment prospects for technical degree recipients and their potential contributions to the local economy.
