

Introduction to Environmental Science

Description

An overview of environmental science and current global concerns, exploring scientific, economic, social and political solutions to environmental problems. Discussion of the history of the environmental movement, environmental regulatory agencies, fundamental principles of resources and their use, population, conservation, and environmental health. A field trip will not be required.

Rationale

As the world's population and economy grows, humans are contributing to a rapid change in the world's climate, placing a greater demand on natural resources, encountering natural hazards more frequently, and increasing environmental pollution. College-educated consumers, voters, and decision-makers need to understand the scope and impact of these changes and the limitations that science and technology have in reducing their negative effects. An understanding of environmental science can help provide this understanding and suggest ways to adapt to and mitigate these changes.

Objectives

- Learn to read, interpret, and comprehend scientific information
- Develop an understanding of the basic principles of chemistry, biology, geology, meteorology, oceanography, and physics as applied to Earth's systems
- Become familiar with Earth's major ecosystems and biogeochemical cycles, how they function, and how humans affect them
- Learn to think critically about environmental problems and their solutions
- Become familiar with the laws and government agencies which regulate or respond to environmental problems
- Become familiar with the environmental challenges facing Central Texas and the ways that they can be addressed
- Discuss environmental issues in a respectful and professional manner

Outcomes

Course-Level - upon successful completion of this course, students will be able to:

- describe the major processes in the hydrologic cycle, and the global carbon, phosphorus and nitrogen cycles
- explain how biological species, populations, and communities interact
- explain the theory of biological evolution

- describe how energy is obtained from nonrenewable and renewable sources and the relative merits of using these sources
- describe the major types of air, water and soil pollution, their sources, and their effects on the environment
- explain the causes and effects of global climate change
- describe the major environmental hazards to human health and how their risk is assessed and perceived

Program-Level - as an Associate of Science in Environmental Studies required course, students will be able to:

- describe the interaction between science, sustainability, and stewardship as applied to Earth systems and human society
- describe the scientific method and how it is used to approach and solve environmental problems
- describe human population growth and its impacts on Earth's living systems, including climate change, ozone depletion, biodiversity loss, and pollution
- describe ecosystems function and type for the major planetary biomes
- describe the importance of food webs, trophic levels, and their relationship to the biomass pyramid
- explain the various disruptions/changes to the Earth's system, including global climate change, ozone depletion, biodiversity loss, soil loss, and soil and water pollution.

General Education - as a Core Curriculum course, students completing this course will demonstrate competence in:

- critical thinking in the gathering, analyzing, synthesizing, evaluating and applying information
- quantitative and empirical reasoning through the application of mathematical, logical and scientific principles and method

Instructional Methods

This course will be taught in a lecture/discussion format illustrated with videos, maps, diagrams, digital photographs and content on Web sites. Student learning will be assessed with four in-class exams.

Registration

Section 70352 – 10:30-11:50 A.M. Monday and Wednesday in NRG Rm. 1214

Prerequisite - Reading and writing proficiency on Texas Success Initiative (TSI) testing or have a TSI exemption

Credit - A student may not receive credit for both ENVR 1301 and BIOL 2206.

Required Textbook

Withgott, Jay and Laposata, Matthew, 2018. Environment; the science behind the stories (6th edition): San Francisco, Pearson Education, 664 p., ISBN 978-0-13-420488-8 (print)

Communication

Professor: Robert (Bob) H. Blodgett, Ph.D., P.G., Professor

Office Hours:

- 12:00 to 3 P.M. on Monday in NRG Room 2216
- 12:00 to 1:20 P.M. Tuesday in HLC Room 1431
- 4:30 to 5:10 P.M. Tuesday in HLC Room 1431
- By appointment 11:50 A.M. to 3 P.M. Wednesday in NRG Room 2216
- By appointment 12:00 to 1:20 P.M. Thursday in HLC Room 1431
- By appointment 4:30 to 5:10 P.M. Thursday in HLC Room 1431

Telephone/ voice mail: 512-223-4276

Electronic mail: rblodget@austincc.edu - checked at least daily Monday through Friday; Students are also expected to check their ACCmail accounts regularly during the work week.

Web page: www.austincc.edu/rblodget

Assessment and Grading

Examinations

Four in-class, closed-book tests will contain multiple-choice, matching, and short- and long-answer questions drawn from lectures, handouts, and reading assignments. The final examination on the last day of class will emphasize material covered since the last mid-term examination. No examinations will be given early. If a single mid-term exam is missed, the final exam score will be recorded for that missed exam. Scores of 70 or greater on the final examination will substitute for the lowest mid-term examination score. You will be asked to bring a Green Scantron form to each exam. Review sheets will be distributed before each examination. You must notify the professor of any mistakes or disagreements in scoring within two days after a corrected exam has been returned to the class.

Grading

Your final course average will be calculated as follows:

24%	Mid-term Exam 1	24%	Mid-term Exam 3
24%	Mid-term Exam 2	28%	Final Examination

There is no "extra credit." The following scale will be used to determine your course grade:

90-100%	- A	70-79%	- C	Below 60%	- F
80-89%	- B	60-69%	- D		

Students whose final course average is 59%, 69%, 79%, or 89% will be advanced to the next higher grade if their final exam score shows improvement over their mid-term exam scores.

Course Policies

Participation

You are expected to attend all classes, participate in class discussion, and work with your professor and classmates to learn the course content. This may include distributing and collecting course materials, participating in demonstrations, and cleaning up the classroom.

Withdrawal

If you decide to withdraw from this class, it is your responsibility to protect your academic record by withdrawing no later than Monday, April 29, 2019. You must print out confirmation of your withdrawal to verify its completion. The professor also reserves the right to withdraw a student for not complying with course/ACC policies or for not meeting course objectives. Departmental policy forbids the professor from withdrawing you after April 29, 2019. State law permits students to withdraw from no more than 6 courses during their entire undergraduate career at Texas public colleges and universities. With certain exceptions, all course withdrawals automatically count towards this limit. Students who enroll for the third or subsequent time in a course taken since Fall 2002, may be charged higher tuition for that course. Details on this policy can be found in the ACC Catalog: www.austincc.edu/catalog/.

Incomplete Grade

An incomplete (grade of "I") will only be given if extenuating circumstances, such as illness or death of a loved one, prevent a student from completing the final exam. Incompletes must be requested in writing with documentation of the extenuating circumstances. If a grade of I is given, the final exam must be taken no later than July 10, 2019.

See the attached "ACC Policies and Services" for additional policies.

Studying

Science courses generally require a different approach to studying than other courses. In this course you will need to conceptualize things in three dimensions, understand complex concepts, and learn a whole new vocabulary for describing your planet. You will improve your performance if you:

- read each textbook chapter
- re-read the "Reviewing Objectives" section of each chapter
- take notes from both the textbook and lecture
- answer the "Testing Your Comprehension" questions at the end of each chapter
- learn the key terms highlighted in bold type in each assigned chapter.

Many students find it useful to make flash cards with the definition and environmental significance of each key term. You may also find it beneficial to study in groups with your classmates. Many students underestimate the amount of time needed to pass this course. At a minimum, you should spend 2 hours outside of class studying for every hour you spend in class. A free tutor may be available at an ACC Learning Lab; check

<http://sites.austincc.edu/ees/tutoring-and-learning-labs/> after the first week of classes for locations and hours.

Classroom Etiquette

You are expected to be seated and ready for class on time, and not leave your seat during lecture. Take a seat near the door if you arrive late or need to leave early. Please notify the professor if you have to arrive late or leave early on a regular basis. As common courtesy, do not interrupt the professor or classmates when they are speaking, do not carry on conversations during lectures, and turn off audible alarms on your electronic equipment. Use of personal laptop computers in the classroom is discouraged and prohibited if the computer screen is visible to your classmates. Texting is only allowed at designated times - you are expected to focus on course content and not multi-task.

ENVR 1301 Course Schedule*

Week	Topic	Chapters
1	Introduction	Preface, 1
2	Chemistry, Physics and Geology	2
3	Evolution and Population Ecology	3
4	Species Interactions and Ecology	4
5	Ecosystems	5
	Exam 1 (Chap. 1-4) – Feb 20	-
6	Ecosystems and Environmental Policy	5, p. 136-137, 7
7	Soil and Agriculture	8,10
8	Biodiversity and Conservation	11
	Spring Break – no classes	
9	Forests	12
	Exam 2 (Chap. 5-11) – Mar. 27	-
10	Environmental Health and Toxicology	14
11	Hydrologic Cycle and Water Pollution	15
12	Marine Pollution and the Atmosphere	16,17
13	Air Pollution	17
	Exam 3 (Chap. 12-16) – Apr. 24	
14	Global Climate Change	18
15	Energy Sources and Alternatives	19, 20, 21
16	Solid Waste Management	22
	Final Exam (Chap. 17-22, review) – May 15	-

*Schedule changes may occur during the semester. Any changes will be announced in class.

ACC POLICIES AND SERVICES

Attendance/Class Participation: Regular and punctual class attendance is expected of all students. If attendance or compliance with other course policies is unsatisfactory, the instructor may withdraw students from the class.

Incompletes: An instructor may award a grade of “I” (Incomplete) if a student was unable to complete all of the objectives for the passing grade in a course. An incomplete grade cannot be carried beyond the established date in the following semester. The completion date is determined by the instructor but may not be later than the final deadline for withdrawal in the subsequent semester.

Scholastic Dishonesty: A student attending ACC assumes responsibility for conduct compatible with the mission of the college as an educational institution. Students have the responsibility to submit coursework that is the result of their own thought, research, or self-expression. Students must follow all instructions given by faculty or designated college representatives when taking examinations, placement assessments, tests, quizzes, and evaluations. Actions constituting scholastic dishonesty include, but are not limited to, plagiarism, cheating, fabrication, collusion, and falsifying documents. Penalties for scholastic dishonesty will depend upon the nature of the violation and may range from lowering a grade on one assignment to an “F” in the course and/or expulsion from the college. See the Student Standards of Conduct and Disciplinary Process & other policies at <http://austincc.edu/current-students>.

Student Rights and Responsibilities: Students at the college have the rights accorded by the U.S. Constitution to freedom of speech, peaceful assembly, petition, and association. These rights carry the responsibility to accord the same rights to others and not to interfere with or disrupt the educational process. Opportunity for students to examine and question pertinent data and assumptions of a given discipline, guided by the evidence of scholarly research, is appropriate in a learning environment. This concept is accompanied by an equally demanding concept of responsibility on the part of the student. As willing partners in learning, students must comply with college rules and procedures.

Students with Disabilities: Each ACC campus has support services for students with documented disabilities. Students who need classroom, academic or other accommodations must request them through the Student Accessibility Services (SAS) office. Requests should be made during course registration or at least 3 weeks before the semester to avoid delaying accommodations. Students with SAS approval for accommodations must provide their professor with a ‘Notice of Approved Accommodations’ before the professor can make the accommodations. Students should give their Notice to the professor at the beginning of the semester because a reasonable amount of time may be needed to prepare and arrange for accommodations. For additional information see <http://austincc.edu/sas>.

Safety: ACC is committed to providing a safe and healthy environment for study and work. Students are expected to learn and comply with environmental, health and safety procedures and agree to follow ACC safety policies. Additional information is at <http://austincc.edu/ehs>. Because some health and safety circumstances are beyond our control, we ask that you become familiar with the Emergency Procedures poster and Campus Safety Plan map in each classroom. Information about emergency procedures and how to sign up for ACC Emergency Alerts to be notified in the event of a serious emergency can be found at: <http://austincc.edu/emergency/>. You are expected to conduct yourself professionally with respect and courtesy to all. Anyone who thoughtlessly or intentionally jeopardizes the health or safety of another individual will be dismissed from an activity, may be withdrawn from the class, and/or barred from attending future activities.

Concealed Handguns: The ACC concealed handgun policy ensures compliance with Section 411.2031 of the Texas Government Code (also known as the Campus Carry Law), while maintaining ACC’s commitment to provide a safe environment for its students, faculty, staff, and visitors. Beginning August 1, 2017, individuals who are licensed to carry (LTC) may do so on campus premises except in locations and at activities prohibited by state or federal law, or the college’s concealed handgun policy. It is the responsibility of license holders to conceal their handguns at all times. In addition, concealed weapons are not allowed on ACC-sponsored field trips where the school owns or has chartered or leased vehicles for transportation. Persons who see a handgun on campus are asked to contact the ACC Police Department by dialing 222 from a campus phone or 512-223-7999. Refer to the concealed handgun policy online at <http://austincc.edu/campuscarry>.

Use of ACC email: All College e-mail communication to students will be sent solely to the student’s ACCmail account, with the expectation that such communications will be read in a timely fashion. ACC will send important information and will notify you of any college related emergencies using this account. Students should only expect to receive email communication from their professor using this account. Likewise, students should use their ACCmail account when communicating with professors and staff. Instructions for activating an ACCmail account can be found at <http://austincc.edu/accmail/>.

Testing Center Policy: Under certain circumstances, a professor may have students take an examination in an Academic Testing Center. Students using a Center must govern themselves according to the *Student Guide for Use of ACC Testing Centers* and should read the entire guide before going to take the exam. To take an exam, one must have: an ACC Photo ID, the Course Abbreviation & Number, the Course Synonym, the Course Section, and the Professor’s Name. Bringing a cell phone in a testing room, regardless of whether it is on or off, will revoke testing privileges for the remainder of the semester. ACC Testing Center policies are at <http://austincc.edu/testctr/>.

Student and Instructional Services: ACC strives to provide students with exemplary support and a variety of opportunities and services; these are listed at <http://austincc.edu/current/>. ACC Learning Labs provide free tutoring for many courses, help with setting up your ACCID and ACCmail, and assistance with ACC Blackboard. Tutor availability and schedules vary with campus and are at: <http://austincc.edu/tutor>.

Student Support Services: Free and confidential resources to support you are available at every campus. Here are just a few of them:

- Food pantries – at Student Life offices (<https://sites.austincc.edu/sl/programs/foodpantry/>)
- Assistance paying for childcare or utility bills – at the Support Center (<http://austincc.edu/students/support-center>)
- Help with budgeting for college and family life – at the Student Money Management Office (<http://sites.austincc.edu/money/>)
- Help with sudden, unexpected expenses which could cause you to withdraw from a course – apply to the Student Emergency Fund (<http://www.austincc.edu/SEE>)
- Help with a personal or mental health concern – see a Counselor at any campus (<http://austincc.edu/students/counseling>)
