

# Hazard Assessment -Terrestrial Field Activity

Probability of this hazard is:

H = high M = medium L = low V= very unlikely N= not known to be present

## Mammals and Reptiles

- Alligators
- Bats or bat guano
- Bears
- Coyotes or wild dogs
- Livestock
- Mountain lions
- Peccaries or feral pigs
- Poisonous snakes
- Rodent droppings
- Skunks
- Other \_\_\_\_\_

## Arthropods

- Bees and wasps
- Biting flies
- Chiggers
- Fire ants
- Mosquitoes
- Poisonous spiders
- Scorpions
- Ticks
- Other \_\_\_\_\_

## Plants

- Lechuguilla or other *Agave*
- Mesquite or other thorny shrubs
- Poison ivy or poison oak
- Prickly pear or other cacti
- Stinging nettles
- Other \_\_\_\_\_

## Land and Water Conditions

- Blowing dust
- Cave entrances or sinkholes
- Cliffs or highwalls
- Falling rocks
- Overhanging ledges
- Piles of loose sand/gravel
- Primitive stream crossings
- Rapid water
- Slippery wet surfaces
- Talus slopes (scree)
- Water-saturated sediment
- Other \_\_\_\_\_

## Anthropogenic Hazards

- Aircraft traffic
- Barbed wire
- Blasting caps, powder
- Broken glass
- Electrical equipment
- Electrified fences
- Heavy equipment
- Humans with weapons
- Loud noise
- Mine shafts or adits
- Nails or other sharp objects
- Open trenching
- Power lines
- Rail traffic
- Vehicle traffic
- Other \_\_\_\_\_
